Allowable Subject Matter

1. The indicated allowability of claims 4,6-8,10-13 and 17-18 is withdrawn in view of the newly discovered reference(s) to Barker (US 6,020,577). The examiner regrets for any inconveniences. Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 4,6-8,10-13 and 17-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dadson (US 2,174,079) in view of Barker (US 6,020,577). Dadson discloses the step of radiating energy mainly toward the lower portion (17) of said oven by at least one resistor (13) arranged in an intermediate portion of a box-shaped housing of the oven and defining therein at least two baking chambers (16,17), so that the effect of natural convection into said chambers (16, 17) is comparable. However, Dadson does not disclose a support frame in the housing including a pair of first bars flanking the one resistor, second bars bent upward connected to said first bars, and portions bent inward and holding the one resistor in the seats. Barker discloses, figure 2, a support frame in the housing including a pair of first bars (22) flanking the one resistor (12), second bars (20a,20b) bent upward connected to said first bars (22), and

portions bent inward (21). It would have been obvious to one ordinary skill in the art at the time the invention was made to utilize in Dadson a support frame in the housing including a pair of first bars flanking the one resistor, second bars bent upward connected to said first bars, and portions bent inward as taught by Barker in order to hold the one resistor in the seats.

Response to Amendment

4. Applicant's arguments with respect to claims 4,6-8,10-13 and 17-18 have been considered but are moot in view of the new ground(s) of rejection.
5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang T. Van whose telephone number is 571-272-4789. The examiner can normally be reached on 8:00Am 5:00Pm M-F.
